GitHub: github.com/shubhambhoyar1 | Portfolio: shubhambhoyar.vercel.app

SUMMARY

Full Stack Developer with nearly 3 years of experience building and deploying scalable web applications with Node.js, React.js and microservices. Specialised in WhatsApp Business API, WhatsApp Flows and customer-engagement platforms (WhatsApp, SMS, RCS). Comfortable owning features end to end: API design, database schemas, authentication, integrations and deployment.

TECHNICAL SKILLS

Backend: Node.js, Express.js, REST APIs, Microservices, WhatsApp Business API
Frontend: JavaScript (ES6+), TypeScript, React.js, HTML5, CSS3
Databases: MongoDB, PostgreSQL, MySQL, query optimization
Messaging & Caching: RabbitMQ, Redis
Cloud & DevOps: AWS (S3), Docker (basic), CI/CD
Monitoring: Grafana, Loki
Tools: Git, Postman
Familiar with: RAG (retrieval-augmented generation), LLM integration, embeddings, vector search (Qdrant)

EXPERIENCE

Software Developer | Leadows Technologies Pvt Ltd, Nagpur *Nov 2023 – Present*

- Build full-stack enterprise applications using Node.js, React.js, PostgreSQL and MongoDB.
- Designed a microservices architecture using REST APIs, RabbitMQ and Redis.
- Built customer communication platforms supporting WhatsApp, SMS and RCS.
- Integrated a payment gateway with WhatsApp Business API for in-chat payments.
- Improved the database pipeline to retrieve large volumes of data efficiently.
- Optimized database queries to improve performance.
- Added monitoring with Loki and Grafana for logs and system visibility.
- Designed database schemas and audit logging, and built secure third-party integrations.

Software Engineer Intern | Qloron Pvt Ltd, Nagpur *Dec 2022 – May 2023*

- Built frontend features using JavaScript, HTML, CSS and React.
- Assisted with REST API integration and learned full-stack development practices.

PROJECTS

WhatsApp Flow Automation Platform
Node.js, React.js, WhatsApp Business API

- Built a low-code platform where businesses create and manage WhatsApp Flows for their WhatsApp Business Account.
- Implemented drag-and-drop flow building with reusable components (Heading, Text Body, Conditions, Rich Text, Input Text and more).
- Added validation to prevent configuration errors before a flow is built.
- Automated Flow JSON generation through adapters with a single build action.
- Built a simulator that previews the flow on a mobile screen before deployment.

Chatbot Analytics Dashboard

Node.js, React.js, MongoDB

- Tracked user journeys by storing milestones at key points in the chatbot conversation.
- Built statistics showing total visitors, where most users drop off, and how many complete the service.
- Gave businesses clear traffic and drop-off data to improve their services.

Data Migration Script (AWS to Data Center)

Node.js, MongoDB

- Replaced AWS URLs with data-center URLs across 50,000 to 1,00,000+ documents after the infrastructure move.
- Counted affected documents before the update and verified the count matched afterwards.
- Tracked completed and pending documents so an interrupted run could be resumed and audited.
- Updated documents in batches to keep the migration fast and safe.

EDUCATION

- **B.Tech, Information Technology**, G.H. Raisoni College of Engineering, Nagpur, 2019–2023, CGPA 8.00
- **Higher Secondary (HSC)**, Z.P. Gandhi Junior College of Science, 2017–2019, 61.69%
- **Secondary School (SSC)**, Samarth Vidhyalaya, Lakhani, 64.20%
